

Anton L.

Middle AQA Engineer

SUMMARY

- Experienced AQA Engineer with 4 years of expertise in web, API, and performance testing.
- Proficient in manual testing, requirements analysis, and writing test documentation.
- Skilled in various programming languages including JavaScript, TypeScript, Python, and Java.
- Familiar with a wide range of tools and technologies such as GitHub, Azure, Selenium, Cypress, and Jira.
- Strong knowledge of software development life cycle and Quality Assurance methodologies.
- Experienced in test automation at different levels using technologies like Playwright, Jest, and Docker.
- Excellent communication and problem-solving skills, with a strong ability to prioritize and coordinate testing activities.

TECHNICAL SKILLS

Main Technical Skills	AQA Engineer (5 yr.)
Programming Languages	Java (1 yr.), JavaScript, Python (1 yr.), TypeScript (4 yr.)
JavaScript Frameworks	Node.js (4 yr.)
Databases & Management Systems / ORM	MySQL (4 yr.)
QA, Test Automation, Security	Allure (4 yr.), API testing, Cucumber (4 yr.), Cypress (4 yr.), Jest (4 yr.), JMeter, JUnit, Mocha (2 yr.), Performance Testing (2 yr.), Playwright (4 yr.), Postman (4 yr.), Selenium (4 yr.), TestRail, Unit Testing (4 yr.), Wdio, WebdriverIO (4 yr.), WEB testing
SDK / API and Integrations	API testing
Collaboration, Task & Issue Tracking	Atlassian Confluence, Jira (4 yr.)
BlockChain and Decentralized Software	Chai (2 yr.)

Virtualization, Containers and Orchestration	Docker (4 yr.)
Deployment, CI/CD & Administration	Jenkins

WORK EXPERIENCE

QA Automation Engineer, DATING APP

Duration: 05.2021 - 06.2023

Summary: Mobile and Web application designed to connect individuals who are looking for romantic relationships, friendships, or casual dating opportunities.

Responsibilities: Determination of levels and types of testing, choosing methodologies and approaches for testing; Defining scope and priorities of tests for automation; Creating, supporting and improving automation framework (UI, API); Developing a testing strategy; Analysis and reporting on test results, improving the stability and speed of testing; Stabilization of already implemented tests; Collaborating with development and engineering teams to identify and troubleshoot issues, and to ensure that quality standards are being met; Integration of CI/CD pipelines; Working with databases; Deployed the automation architecture and integrated it into the overall development cycle; Creating metrics to monitor the development process and its quality.

Technologies: TypeScript, NodeJS, Jest, MySQL, Jira, Jmeter, Jenkins, Postman, Playwright, Allure, Confluence

QA Automation Engineer, APPLICATION FOR ONLINE SALES

Duration: 03.2020 - 05.2021

Summary:

- Web application for online sales
- A platform that provides an opportunity to do business and buy something as an individual

Responsibilities: Building the testing process of manual and automated testing from scratch; Requirements analyzing and testing; Writing test documentation: test cases, checklists and test plans; Working with databases. Integration of CI/CD pipelines; Writing autotests; Creating contract tests; Creating, supporting and improving automation framework (UI, API); Analysis and reporting on test results, improving the stability and speed of testing; Working with databases.

Technologies: TypeScript, NodeJS, Java, WDIO, JUnit, MySQL, Jenkins, Postman, Cucumber, Jira, Test Rail

QA Engineer, YANDEX ASSESSOR TESTER

Duration: 01.2019 - 02.2020

Summary: Testing applications of the Yandex ecosystem.

Responsibilities: Writing test documentation: test cases, checklists and test plans; Documentation research, requirement analysis and clarification with BA/

PO; Planning and estimation of testing effort; Backlog creation and prioritization for the QA activities; Installing bugs in the bug tracking system; Working closely with other developers, UX designers, business and systems analysis; User support, answers to questions in chats; API testing on Postman.

Technologies: Postman, Jira, Allure, LambdaTest, DevTools, MySQL
