

Hiring software engineer as easy as calling a taxi.

Elvin J. Team Lead/.NET Engineer

SUMMARY

- 10+ years of commercial work experience in IT
- Experience in developing applications using C#
- Experience in development on the Microsoft .NET platform (C#, ASP.NET(Core) MVC, ASP.NET(Core) Web API)
- Experience in developing web applications using frontend frameworks.
- Refactoring of the existing applications.
- Good knowledge in OOP, best practices, coding standards.
- Experience in load testing, automated unit testing, configuration of CI/CD, code review.
- Experience with: Database design. Solutions on the back-end from scratch. Remote working.
- Team leadership or mentoring of small team
- Good attention to details.
- Highly motivated team player.
- Upper-Intermediate English
- Availability starting from ASAP

SKILLS

Main Technical Skills	.NET
Programming Languages	C, C#, C++, JavaScript, TypeScript
.NET Platform	ADO.NET, ASP.NET, ASP.NET Core Framework, ASP.NET MVC Pattern, Entity Framework, LINQ, .NET
JavaScript Frameworks	Angular, jQuery
UI Frameworks, Libraries, and Browsers	Bootstrap, CSS, HTML, jQuery, SASS, XML
JavaScript Libraries and Tools	BreezeJS
Java Libraries and Tools	JSON
Java Frameworks	Spring, Spring Boot
Databases & Management Systems / ORM	AWS ElasticSearch, Cosmos DB, Microsoft SQL Server, MySQL, Oracle Database, SQL, T-SQL

Cloud Platforms, Services & Computing	AWS, Azure
Amazon Web Services	AWS ElasticSearch, AWS Lambda, AWS S3
Azure Cloud Services	Azure, Azure Blob Storage, Azure Functions, Azure MSSQL, Cosmos DB
Methodologies, Paradigms and Patterns	Agile, DDD, Kanban, microservices architecture, MVC, OOP, Scrum
SDK / API and Integrations	API, RESTful API, Web API
Web/App Servers, Middleware	Azure DevOps Server (ex TFS Team Foundation Server)
Version Control	BitBucket, Git, GitHub, SVN
Platforms	CMS
Deployment, CI/CD & Administration	DevOps, Pipeline
Virtualization, Containers and Orchestration	Docker
Collaboration, Task & Issue Tracking	Jira
Operating Systems	Windows

EXPERIENCE

.NET Developer

November 2020 - Present

Software Engineer, Chapter Leader, Kapital Bank

February 2017 - November 2020

Software Engineer, State Committee On Property Issues

November 2014 - January 2017

Software Tester, Komtec LTD

January 2013 - November 2014

PROJECTS

Team Lead

Dec 2022 - Present time

Description: Project is fully integrated with Azure. Web Apps are used for main API. Different images and files are stored on Azure Blob Storage. CI/CD configured in Azure pipelines.

Responsibilities:

- Ensure designs are in compliance with specifications and assist the developers.
- Assess new technologies to enhance development process and optimize application delivery. Involved in requirements analysis, requirements development, delivery, support & analysis and documentation.
- Track and report on progress to plan.
- Provide input on the performance of project team members to their supervisors.

Technologies: ASP.NET, Entity Framework, Cosmos DB, Azure Web App, Azure Blob Storage, Application Insights.

Full Stack Developer

Dec 2021 - Dec 2022

Description: Project provides a platform for offline stores, they can sale their product online directly from the store.

Responsibilities:

- Full servers maintenance as Admin few windows servers. Production support live stores, including direct db fixes. Creating monitoring system for Windows Services.
- Refactoring old code.
- Bug fixing.

Technologies: ASP.NET MVC, Windows Services, jQuery, MSSQL, IIS, AWS S3, SignalR, HTML, CSS.

.NET Developer

Jun 2021 - Dec 2021

Description: Company, which provides risk management and asset protection software and services to the automotive industry and property insurance marketplace.

Responsibilities:

- Developing and supporting CMS and it's subsystems.
- Designing and developing new microservices.
- Making code reviews.
- Development of microservices.
- Writing unit tests with code coverage over 80%.

Technologies: .NET Core, Web API, Entity Framework, DDD, MediatR, FluentValidation, NSubstitute, CQRS, xUnit.

Full Stack Developer

Dec 2020 – Jun 2021

Description: Develop a corporate portal for managing partnership program. The Strategic Engineering Partnership Program (SEPP) has been established to manage partners leveraged by Jabil in a more effective and efficient manner. Portal consists of Intranet and Internet portals; they shall be developed including various features related to partner management. The Intranet portal will be used solely by staff and will help to streamline many aspects of the partner management processes. It will help internal stakeholders to access information on partners and subsequently leverage such partners. The Internet portal will be accessible to both certified and uncertified partners and will provide features to streamline partner certification and ongoing engagement. The portal has it's own built search panel and notifications (mobile, email) system to ease the usage.

Responsibilities:

- Development of the new features.
- Bug fixing.
- Support of existing functionality.
Domain investigation, creating documentation.
- Architecture creation.
- New features creation.

Technologies: C#, ASP.NET, ASP.NET Core, ASP.NET MVC, ASP.NET Web API, REST Web Services, REST, JavaScript, AWS (Lambda, S3), Elasticsearch, HTML, CSS, SASS, JSON, XML, Bootstrap.

.NET Developer

Aug 2020 – Dec 2020

Description: Project is fully integrated with Azure. Web Apps are used for main API. There are Azure functions created to send different types of notifications - mobile notifications, sms notifications. Azure Key Vault and AAD are used to secure configuration and services communication. Asynchronous communication between services implemented using Azure Queues. Azure Traffic Manager is used to balance load. Different images and files are stored on Azure Blob Storage. CI/CD configured in Azure pipelines.

Responsibilities:

- Business logic implementation.
- Development of the new features.
- Performance optimizations of the application.

Technologies: ASP.NET Core, Entity Framework, MSSQL, Azure Web App, Azure Functions, Application Insights, JMeterA.

Technical Lead, Custom CRM for Contact Center (Odin)

Jan 2020 – Aug 2020

Description: In-house bank application for Contact Center.

Responsibilities:

- Business logic implementation.

- Development of the new features.
- Performance optimizations of the application.

Technologies: ASP.NET Core, ASP.NET Web API, Angular, Spring Boot, Bitbucket.

FulI Stack Developer

Aug 2019 – Jan 2020

Description: For the customer, this application provides a view of current food information (category, name, image, price, description etc.) on the website. For the administrator in restaurant, this application offers a series of operations to add, update, delete and query the information of food, food order and employees.

Responsibilities:

- Full Stack Developer.
- Developing new features and functionality.
- Implementation and support of website features. Business logic implementation.

Technologies: .NET, .NET MVC, .NET Core, REST Web Services, Entity Framework, Angular, JavaScript, Typescript, HTML, CSS, Bootstrap.

FulI Stack Developer, LRW Questionnaire system

Dec 2018 – Aug 2019

Description: System for generating questionnaires.

Responsibilities:

- Development of the new features.
- Bug fixing.
- Support of existing functionality.
- Communication with customer and 3rd party APIs support.

Technologies: ASP.NET MVC, BreezeJS, MSSQL.

FulI Stack Developer

Feb 2018 – Dec 2018

Description: Customer portal to handle employee in the company. Included salary management, working hours management for contractors and employees.

Responsibilities:

- Added new features into the system.
- Mentored junior and middle engineers.
- Collaborated with distributed team for feature delivery and maintenance.

Technologies: .NET Core, Javascript, MySQL, AWS.

FulI Stack Developer, AMS Situs

Dec 2016 – Feb 2018

Description: Evaluation system for American bank.

Responsibilities:

- Developing new features and functionality.
- Business logic implementation

Technologies: ASP.NET MVC, jQuery, TypeScript, MSSQL.

.NET Developer

May 2015 – Dec 2016

Description: The project is written for real estate companies to conduct transactions.

Responsibilities:

- Bug fixing.
- Developing new features and functionality.
- Refactoring.
- Configuring CI/CD.
- Business logic implementation.

Technologies: .NET Core, Entity Framework, REST Web Services, MSSQL.

.NET Developer, Integration with Government Payment Portal

Jan 2013 – May 2015

Description: Adding and supporting integration services.

Responsibilities:

- Bug fixing.
- Developing new features and functionality.
- Refactoring.
- Configuring

Technologies: ASP.NET MVC, MSSQL.

EDUCATION

Bachelor of Computer Science, Azerbaijan State Oil and Industry University

2008-2012
