

Aparna Surve

Expert UI/ FRONT-END DEVELOPER

SUMMARY

Software engineer with 10+ years of experience in UI development and a strong proficiency in web technologies including HTML5, CSS3, JavaScript, and modern JS frameworks such as Angular and React.js. Proven track record of leading technical teams and managing end-to-end development cycles using Agile methodologies. Skilled in tackling complex problems with microservice APIs, Spring Boot, and cloud integration with AWS. Recognized for enhancing product user experience and system architecture through rigorous debugging and testing practices. Holds a B.Tech in Computer Science and multiple Coursera certifications. Advanced knowledge of dev ops tools and version control systems, excelling in fast-paced environments.

TECHNICAL SKILLS

Main Technical Skills	HTML5, CSS3, JavaScript
Programming Languages	JavaScript
JavaScript Frameworks	Angular
UI Frameworks, Libraries, and Browsers	CSS3, HTML5

WORK EXPERIENCE

Application Developer, Enterprises Reporting Service

Duration: Aug 2015 - Oct 2018

Summary: Liaison with product stakeholders and Business Analysts as UI developer to turn user stories into technical specs for the NEXEN platform, implementing complex business logic in UI screens.

Responsibilities: Implementing complex business logic in UI screens, building responsive pages, REST APIs integration, and full cycle test-driven development and deployment.

Technologies: AngularJs, HTML5, CSS3, Karma, Protractor, GIT, Jenkins, JIRA

Application Developer, Self-Serve Data Extract (SSDE)

Duration: Aug 2015 - Oct 2018

Summary: Designing user experience interface UI/UX strategy, converting findings into responsive UI designs, and leveraging MVC design pattern for organizing application components.

Responsibilities: Designing UI/UX interfaces, developing functional and user acceptance tests, building and deploying applications, maintaining Agile processes.

Technologies: AngularJs, HTML5, CSS3, JavaScript, JQuery, Jasmine, Karma, Jenkins, GIT

Technology Analyst, Various Website Redesigns

Duration: Oct 2018 – Feb 2020

Summary: Redesigning existing websites for better navigation and visual appeal, enhancing search engine rankings, translating UX mockups into responsive features.

Responsibilities: Designing and updating layouts, backend integration, migrating legacy AngularJS modules to modern React components.

Technologies: HTML5, CSS3, Vue.js, JavaScript, AWS REST APIs

Team Lead, Accenture

Duration: Feb 2020 – Jan 2023

Summary: Led project teams in gathering requirements, designing, and prototyping, and collaborated to develop and customize mobile/UI applications.

Responsibilities: Leading project requirement gatherings, developing, customizing, coordinating between teams, mentoring, and production support.

Technologies: Angular, NgRx, HTML5, Microservices

DevOps Engineer, Swisscom

Duration: Mar 2023 – Apr 2024

Summary: Technical Engineer for Swisscom Prepaid use case web redesign, improved product sales by refining user interactions and built responsive web pages.

Responsibilities: Building responsive pages, translating stakeholder requirements into code, defining interaction models, establishing UX/UI brand standards.

Technologies: Angular, NgRx, TypeScript

System Analyst, Cybage Software

Duration: Mar 2024 – Aug 25

Summary: End-to-end front-end development, collaborated with clients on system requirements, led agile practices, and developed reusable UI components.

Responsibilities: Front-end development, system requirement analysis, implementing agile practices, developing reusable UI components, and acting as a bridge between teams.

Technologies: Angular, React.js, Hooks, Agile Development

EDUCATION

- **B. TECH, CS**
- MIT World Peace University (MIT-WPU)
- **Diploma in Computer engineering**
- ESSP Diploma College

CERTIFICATION

- **Certified SAFe 5 Agilist**
- **Server-side Development with NodeJS**
- **Front-End JavaScript Frameworks: AngularJS**
- **HTML, CSS and JavaScript**
