

Mohammed Himaz Ameer

Intern Student in Software Engineering & Aspiring Digital Marketer

SUMMARY

A proactive software engineering student immersed in foundational studies and Higher National Diploma coursework, with a focus on software engineering principles as mandated by the IIT curriculum. The engineer displays a blend of technical prowess and an emerging proficiency in digital marketing tools. Technical familiarity includes a command of digital platforms and a learning trajectory in CRM tools. Although specific programming languages and systems development life cycle (SDLC) experience are not detailed, the engineer's academic route aligns with an understanding of key software engineering methodologies. A penchant for content creation across social media further showcases a versatility that extends beyond core software development, poised to contribute inventively to tech-centric marketing initiatives.

TECHNICAL SKILLS

Main Technical Skills	DigitalOcean, Social SDK, WebRTC, Git
JavaScript Libraries and Tools	Canva
Cloud Platforms, Services & Computing	DigitalOcean
Collaboration, Task & Issue Tracking	Atlassian Confluence, IBM Rational ClearCase
Version Control	Git
UI/UX/Wireframing	Prototyping
Mail / Network Protocols / Data transfer	WebRTC

WORK EXPERIENCE

EDUCATION

- **Foundation & Higher National Diploma in Software Engineering**
Studying at Nebula SLT University in collaboration with CAIT (IIT)

Curriculum).

Current

- **G.C.E. Ordinary Level (O/L)**

Results Pending

Completed in 2024
