Ini D.
Senior Salesforce Commerce Cloud Developer

SUMMARY

- 7 years of experience designing, developing, programming, maintaining, and marketing networks and applications.
- Experienced FullStack Developer, ERP Administrator, SFCC Developer and Technology
- Intermediate English
- Available ASAP

TECHNICAL SKILLS

Main Technical Skills	Salesforce Commerce Cloud (2 yr.), Salesforce (2 yr.)
Programming Languages	C#, Go, Java, JavaScript, Kotlin, PHP (5 yr.), Python, Ruby, TypeScript
JavaScript Frameworks	Angular (3 yr.), AngularJS (3 yr.), jQuery, Node.js (1 yr.), React
.NET Platform	Azure
PHP Frameworks	CodeIgniter, Laravel (1 yr.)
UI Frameworks, Libraries, and Browsers	CSS, HTML5, jQuery
Java Frameworks	Hibernate, Spring
Java Libraries and Tools	JavaFX, Java SE, Swing
Android Libraries and Tools	Kotlin
JavaScript Libraries and Tools	React Native (2 yr.)
Salesforce Ecosystem	Salesforce (2 yr.), Salesforce Apex, Salesforce Commerce Cloud (2 yr.)
Wordpress Ecosystem	WooCommerce
Databases & Management Systems / ORM	Firebase, Hibernate, MongoDB, MySQL, NaviCat, RDBMS, SQL

Cloud Platforms, Services & Computing	AWS, Azure, GCP, Salesforce Commerce Cloud (2 yr.)
Industry Domain Experience	Multimedia
Web/App Servers, Middleware	Apache HTTP Server, Nginx
Scripting and Command Line Interfaces	Bash
Deployment, CI/CD & Administration	CI/CD, DevOps
Hosting, Control Panels	cPanel
Virtualization, Containers and Orchestration	Docker
Platforms	ERPNext, Firebase, Salesforce (2 yr.)
Version Control	Git
SDK / API and Integrations	Google Maps API, OAuth, Office 365 API, Open Commerce API
Third Party Tools / IDEs / SDK / Services	Jinja2, Office 365
Operating Systems	Linux
Methodologies, Paradigms and Patterns	MVC, UML
QA, Test Automation, Security	Postman, Selenium Webdriver
Other Technical Skills	Cambium Networks, CRM, ERP (Enterprise Resource Planning), Frappe, Huawei RTN, Mikrotik, Stanford Core NLP, StanfordCore NLP

EXPERIENCE

IT Administrator, Engineering Automation Technology Limited

JUNE 2019 - PRESENT
Responsibilities:

- Performed the role of Salesforce Developer in the Organization.
- Strategic planning and IT Leadership across the entire organization.

- Developing software for the organization; Management of Microsoft Office365, Azure, and Google Cloud Account. ERP Management - Developing scripts to customize and support operations on the ERP.
- Salesforce CRM Account Management, Administration, and Development.
- Network Administration (LOS Management Dedicated Leased Line), Microsoft and Linux Server Installation and Management whilst providing IT Training to new employees in the organization.

Senior Software Developer, Nugi Technologies

OCTOBER 2018 - JUNE 2019
Responsibilities:

- Created web and mobile applications using React Native, Angular, React Python, NodeJS, Ruby, and PHP to create RESTful services.
- Mentored junior and mid-level engineers.
- Collaborated with team to brainstorm and create new products
- Documented and modeled solutions by developing documentation, flowcharts, layouts, diagrams, charts, code comments, and clear code.

PROJECTS

Salesforce Migration

Sep. 2021 - Oct. 2021
Description: Migration of CRM from ERPNext to Salesforce.
Responsibilities:

- Creating new user-profiles and access levels
- Uploading/Importing data to Salesforce CRM
- Integration of Salesforce on Office 365

Technologies: Office 365, Salesforce, ERPNext

Omron Healthcare

May. 2019 - Oct. 2019
Description: SFCC Developer - Developed custom UI using CSS, HTML, Visualforce components and used JQuery, JavaScript for front-end validation.
Responsibilities:

- Responsible for writing SOQL and SOSL queries.
- Developed Apex classes and Triggers and linked them to manage the workflows.
- Integration of Salesforce with Azure Active Directory SSO
- Maintenance of CRM functionality implementing SFDC.
- Developed different Visual Force Pages to suit to the needs of the application using different Visual force components

Technologies: Office 365, Salesforce, ERPNext

ERP Development

Dec. 2019 - Jan. 2020
Description: Development of an ERP application for an engineering services company in the oil
and gas industry.
Responsibilities:

- Solely responsible for the customization and deployment of an ERP (Web Application)
- Developed APIs and handled software integration between ERP applications and third-party solutions
- Performed DevOps activities to maintain applications deployed on a GCE Virtual Machine.

Technologies: PHP, Python, AngularJS, Frappe, Jinja2, Git, Docker, Google Cloud Platform, Linux, SQL

Abit Trader

Mar. 2020 - Aug. 2020
Description: Development of a crypto trading platform for Abit Global Digital Asset Exchange. Upgraded to React
Responsibilities:

- Supported the development team as a consultant for the development of a mobile and web application

- Handled sensitive API integrations
- Collaborated with the development team by designing wireframes and mockups

Technologies: PHP, NodeJS, Kotlin, Ruby, Angular, Git, Docker, AWS, Linux, SQL, Selenium, MongoDB, React

LAWMA Mobile Application

May.2020 - Aug. 2020
Description: Development of a waste management application for Lagos Waste Management Authority.
Responsibilities:

- Supported the development team as a consultant for the development of a mobile and web application
- Collaborated with the project team in modeling the entire solution: B2C and B2B modeling.
- Collaborated with the development team by designing wireframes and mockups

Technologies: PHP, NodeJS, Python, React Native, Angular, Git, Microsoft Azure, Linux, SQL, MongoDB

UGS Smart Grow Web Application

Dec. 2018 - Dec. 2019
Description: Development of a smart grow web application for Universal Growth Solutions LLC.
Responsibilities:

- Performed DevOps activities to maintain applications deployed on a GCE Virtual Machine.
- Modeled the entire application to meet the client's requirements
- led a team of developers in the development of a web application based on customers' requirements.
- Front-end and back-end development

Technologies: PHP, AngularJS, Git, AWS, Linux, SQL

Tailorgang Mobile

Aug. 2018 - Jun. 2019
Description: Development of a cross-platform (Android & iOS) mobile application for a fashion company
Responsibilities:

- Led a team of developers in the development of a mobile application based on customers' requirements.
- Collaborated with the project team in modeling the entire solution: B2C and B2B modeling.
- Solely responsible for the development and deployment of a mobile application

Technologies: PHP, NodeJS, React Native, Git, AWS, Linux, SQL, MongoDB, Firebase, Multimedia,
Google MAPs

Tailorgang Web

Dec 2018 - Jun. 2019
Description: Development of a web application for a fashion company.
Upgraded from AngularJS to React
Responsibilities:

- Collaborated with the project team in modeling the entire solution: B2C and B2B modeling.
- Front-end and back-end development
- Led a team of developers in the development of a web application based on customers' requirements.

Technologies: PHP, NodeJS, AngularJS, Git, Docker, AWS, Linux, SQL, Selenium, MongoDB, React

Tailorgang Academy

Dec. 2018 - Jun. 2019
Description: Development of an online learning platform for Tailorgang LLC.
Upgraded from AngularJS to React
Responsibilities:

- Collaborated with the project team in modeling the entire solution: B2C and B2B modeling.
- Front-end and back-end development
- Led a team of developers in the development of a web application based on customers' requirements.

Technologies: PHP, NodeJS, AngularJS, Git, Docker, AWS, Linux, SQL, Selenium, MongoDB, React

CloudSkul

Jan. 2019 - Jun. 2019
Description: Development of an ERP for educational institutes.
Responsibilities:

- Supported the development team as a consultant for the development of a web application
- Collaborated with the project team in modeling the entire solution: B2C and B2B modeling.
- Collaborated with the development team by designing wireframes and mockups

Technologies: PHP, NodeJS, AngularJS, jQuery, Git, Docker, AWS, Linux, SQL, Selenium, MongoDB

Vaden EMR

Mar. 2019 - Sep. 2019
Description: Development of an EMR application for a clinic.
Responsibilities:

- Led a team of developers in the development of a web application based on customers' requirements.
- Server configuration
- Front-end and back-end development

- Manipulated data using CRUD (create, read, update and delete) operations of MySQL database management system and handled database access and data transmission based on RESTful web service.

Technologies: PHP, AngularJS, CodeIgniter, Git, Docker, Linux, SQL Kez and Honours Tours & Travels

Website

Nov. 2017 - Feb 2018
Description: Development of a single-page web application for a tour and travel company.
Responsibilities:

- Developed the UI layout and front-end programming for the web application based on customers' requirements.
- Extensively worked on RESTful web services.
- Manipulated data using CRUD (create, read, update and delete) operations of MySQL database management system and handled database access and data transmission based on RESTful web service.
- Created website layout/user interface by using standard HTML/CSS practices
- Responsible for maintaining, expanding, and scaling website

Technologies: PHP, AngularJS, jQuery, cPanel, SQL

FSS Alumni Website

July. 2016 - Mar. 2017
Description: Development of a website and alumni management portal for the Faculty of the Social Science University of Calabar.
Responsibilities:

- Developed the UI layout and front-end programming for the web application based on customers' requirements.
- Extensively worked on RESTful web services.
- Manipulated data using CRUD (create, read, update and delete) operations of MySQL database management system and handled database access and data transmission based on RESTful web service.
- Created website layout/user interface by using standard HTML/CSS practices
- Responsible for maintaining, expanding, and scaling website

Technologies: PHP, jQuery, cPanel, SQL

PlusLife+

May. 2015 - Nov. 2015
Description: Development of an Android real-time communication/messaging application
Responsibilities:

- Collaborated with the development team by designing wireframes and mockups
- Collaborated with the development in the production of Java and Python programs

Technologies: Python, Go, Java

Unity Beauty Queen Website

Oct. 2016 - Dec. 2016
Description: Development of a website with the feature for online auditioning for a beauty contest.
Responsibilities:

- Led the team of developers in the development of quality codes for the front-end and backend
- Manipulated data using CRUD (create, read, update and delete) operations of MySQL database management system and handled database access and data transmission based on RESTful web service.
- Created website layout/user interface by using standard HTML/CSS practices
- Designing wireframes and mockups

Technologies: PHP, AngularJS, cPanel, SQL

English to Efik Text-Based Translator

Nov. 2015 - May 2016
Description: Development of an automated English-to-local-language translator using Natural Language Processing
Responsibilities:

- Solely responsible for coding the entire project
- Collaborated with a university professor in modeling the process flow of the entire application
- Researched the development of a bilingual dictionary

Technologies: JAVA SE, Hibernate, MYSQL, Stanford Core NLP

EDUCATION

University of Calabar, Nigeria, Bsc Computer Science

FEB 2012 - 2017
Studied Computer Science/Mathematics/Statistics but specialized in Computer Science.

CERTIFICATES

- MySQL 5.7 Administration — Brainbench
- MS Exchange Server 2010 Administration — Brainbench
- ERP and CRM Systems Development — Metropolitan School of Business and Management UK
- ISO 9001:2015 QMS Requirements — Standard Organization of Nigeria

AWARDS

- Best Programmer Department of Computer Science, University of Calabar
- First Position Cross River State, Cowbell Mathematics Competition
