UPSTAFF

Amir
Senior React Native Engineer

SUMMARY

- React/React Native Engineer with almost 6 years of professional experience - Experience with Amazon/Amplify/S3/Code push - Successfully developed both iOS and Android applications using React Native - Developing React/React Native apps that interface with Restful APIs - Experience with React/Redux/Third-Party API Integrations - Experience with GraphQL/Apollo - Upper Intermediate English - Available ASAP

TECHNICAL SKILLS

Main Technical Skills	React Native, React
Programming Languages	JavaScript, TypeScript
JavaScript Frameworks	AngularJS, Express, jQuery, Next.js, Node.js, React
JavaScript Libraries and Tools	Canvas, React Native, Redux, Redux-Saga
Databases & Management Systems / ORM	Microsoft SQL Server, MongoDB, MySQL, Neo4j, PostgreSQL
UI Frameworks, Libraries, and Browsers	jQuery, SCSS, Socket.io
Cloud Platforms, Services & Computing	AWS
Amazon Web Services	AWS Amplify, AWS S3
Methodologies, Paradigms and Patterns	Agile
BlockChain and Decentralized Software	ETH (Ethereum blockchain), Web3
Version Control	Git
SDK / API and Integrations	GraphQL
Web/App Servers, Middleware	PWA

EXPERIENCE

React/React Native Engineer, Banking Application with trading feature

2021.08 - till now

Responsibilities:

- Develop Mobile and Web platforms using React Native without expo
- Using Typescript as the main programming language of the project
- Using React's new version and using Hooks in React
- Using React Native component for three platform
- Using Native module for login process (swift, java)
- Using Socket.IO and rest API to get data from the backend
- Using Bitrise to publish apps on both mobile platforms
- Using Git and agile methodology

Technologies: React, React Native, Clean Architecture, Custom UI Implementation, Socket.IO, Firebase, Bitrise

React/React Native Engineer, Blockchain Application with Camera, Location, Web3, GraphQl, ETH payment options

2020.08 - 2021.08

Responsibilities:

- Develop Mobile and Web platforms using React Native without expo
- Using monorepo design pattern
- Using Typescript as the main programming language of the project
- Using React's new version and using Hooks in React
- Using React Native component for three platform
- Using apollo library to get data from the backend
- Using Git and agile methodology

Technologies: React, React Native, Clean Architecture, Custom UI Implementation, Web3, Apollo, Blockchain, Monorepo design pattern.

React/React Native Engineer, Football game news-based Application & Website

2019.06 - 2020.08

Responsibilities:

- Creating an Admin dashboard with React and Redux
- Using Typescript as the main programming language of the project
- Using Amazon Amplify / S3 / Code push
- Connected the app to Amplify for getting data with graphql from Amazon Amplify service
- Using React's new version and using Hooks in React
- Using styled-components as component libraries and styling
- Using Next framework for frontend
- Using React Native for Mobile Applications

- Using Git and agile methodology
- Using Docker for DevOps purposes

Technologies: React, React Native, NextJs, TypeScript, Flow, Clean Architecture, Custom UI Implementation, AMP, PWA, AWS, Amazon, Amplify/S3/Code Push.

React/React Native Engineer, Multi-level marketing Application with in-App purchase

2018.08 - 2019.06

Responsibilities:

- Creating an Admin dashboard with React and Redux and Redux-Saga
- Using Flow as a main type checker of the project
- Using React's new version and using Hooks in React
- Using styled-components as component libraries and styling
- Using Next framework for frontend
- Using Expressjs for some functionality on Rest/API
- Using Git and agile methodology
- Using React Native for Mobile Applications

Technologies: React, React Native, Redux, Redux-Saga, Firebase, Clean Architecture, Custom UI Implementation, ExpressJs, NextJs.

Front-End Engineer, An online customized business card generator Web Application

2017.08 - 2018.06

Responsibilities:

- Creating an Admin dashboard with React and Redux and Redux-Saga
- Using Flow as a primary type checker of the project
- Using React's new version and using Hooks in React
- Using styled-components as component libraries and styling
- Using Angularjs for template editor
- Using Git and agile methodology

Technologies: React, Redux, Redux-Saga, Clean Architecture, Custom UI Implementation, AngularJs.

OTHER/PERSONAL PROJECTS

Shopping Web Application

Responsibilities:

- Creating an Admin dashboard with React and Redux and Redux-Saga
- Using Flow as a primary type checker of the project
- Using React's new version and using Hooks in React
- Using styled-components as component libraries and styling
- Using Next framework for frontend
- Using Git and agile methodology
- Using React Native for Mobile Applications

Technologies: React, NextJs, Redux, Redux-Saga, Clean Architecture, Custom UI

EDUCATION

Master's Degree Azad University Science and Research Branch

September 2019 - June 2021

Bachelor's Degree Azad University Chaluse Branch

September 2017 - June 2019

Major Azad University Nowshahr Branch

September 2015 - June 2017
