

Hiring software engineer as easy as calling a taxi.

Aleksandr G.

Software Test Engineer

SUMMARY

- Experience more than 9+ of professional Software Testing
- Good understanding of QA theory and deliverables
- Clear understanding of SDLC and testing processes: Scrum, Waterfall, XP
- Practical experience in Agile/Scrum development processes
- Strong experience in working with QA documentation, knowledge in using support documentation
- Good knowledge of different testing methods, techniques and types
- Ability to apply test analysis and test design techniques
- Proficient with defect tracking and test management tools
- Strong experience in testing of multiple iOS and Android-based smartphones and tablets
- Experience in web services testing and Responsive Design testing
- Test automation experience
- Upper-Intermediate English
- Availability starting from 01/10/2023

SKILLS

Main Technical Skills	QA
UI Frameworks, Libraries, and Browsers	CSS, HTML, Pixel Perfect
Databases & Management Systems / ORM	SQL
Platforms	Android
Collaboration, Task & Issue Tracking	Atlassian Trello, Jira, Redmine
QA, Test Automation, Security	Boundary Value Analysis, Charles Proxy, Decision Table Testing, Equivalence Partitioning, exploratory testing, Fiddler, JMeter, Postman, QA, Selenium IDE, State transition testing, Use case testing
Version Control	Git, GitLab
Mail / Network Protocols / Data transfer	HTTP, HTTPS

Operating Systems	iOS, macOS, Ubuntu, Windows
Methodologies, Paradigms and Patterns	Kanban, Scrum
SDK / API and Integrations	Swagger

EXPERIENCE

QA Engineer

April 2017 - Present

QA Engineer, Da - 14

June 2017 - December 2017

QA Engineer, Precisepro

April 2016 - May 2017

Software Testing Engineer, Ubertesters.com

February 2014 – April 2016

System administrator, Joint-stock company of the closed type “ToMa”

June 2011 – November 2014

PROJECTS

Software Test Engineer

Jan 2023 – Aug 2023

Description: Product provides solutions for: recycling management, returns management, environmental compliance.

Offers: Environmental Compliance Management (ECM), Collection Schemes (EPR obligations), Deposit Return Scheme (DRS)

Technologies: React, PHP, Postman, Allpairs, Autocad

Software Test Engineer

Jan 2020 - Jul 2020

Description: Web application for online banking of a large CIS bank. New functionality (credits) has been added to the already running application. A separate functionality from a huge

Responsibilities:

- Requirements analysis, Request/response monitoring using proxy server, CMS testing, System integration testing, Integration with 3-rd party application testing, Creating and maintaining of QA documentation (Test plan, Test strategy, Checklist via TestRail and bug reports etc.), Planning, execution (Smoke, Functional, Non-functional, Regression testing) and reporting of test activities, Participating on daily meetings/discussions, Interaction with development team and business analyst, Verification of implemented product according to the requirements, Cross browser testing (Edge,IE,Chrome,FF,Safari, mobile), API testing (Insomnia).

Technologies: PHP, HTML, CSS, JavaScript

Software Test Engineer

May 2019 - Jan 2020

Description: System for creating, assigning and tracking loads and drivers. Used for easy driver finding and monitoring his trip using geolocation.

Responsibilities:

- Requirements analysis, Request/response monitoring using proxy server, creating and maintaining of QA documentation (Test plan, Test strategy, Checklist via TestRail and bug reports etc.), Planning, execution (Smoke, Functional, Non-functional, Regression testing) and reporting of test activities, Interaction with development team, Verification of

implemented product according to the requirements, Mobile testing (Android iOS), Loading, stress testing (Postman, Jmeter), API testing (PAW).

Technologies: XCode (iOS), Laravel Nova

Software Test Engineer, Alpaka

Feb 2019 - May 2020

Description: Security and time tracking system. Mobile (android\iOS) application using to generate and read QR codes or NFC tags with ability to confirm user person by entering pin code

Responsibilities:

- Requirements analysis, Request/response monitoring using proxy server, and maintaining of QA documentation (Test plan, Test strategy, Checklist via TestRail and bug reports etc.), Planning, execution (Smoke, Functional, Non-functional, Regression testing) and reporting of test activities, Interaction with development team, Verification of implemented product according to the requirements, Loading, stress testing (Postman, Jmeter), API testing (Postman).

Technologies: XCode (iOS), Android studio (Android), PHP

Software Test Engineer, Tchop

Mar 2018 - Feb 2019

Description: It is the first out-of-the-box platform that lets you connect with your employees, clients or stakeholders in real time. Content and Chat — in one branded App. User can manage brand, manage app, manage content. Succeed with mobile content. Inside your app you can implement and link to anything - whether it is out there in the web, in your intranet or any other web-based third-party service. Easily set up relevant news and content feeds - without any IT integration needed. Create private or public chat groups around relevant topics or discuss important issues in 1:1 chat and get instant feedback - in a secure environment. Application contains notifications bringing users back and allows delivering important updates or letting users know about messages and mentions happening in chats. Integrations, which can automatically pull content from other sources and systems.

Responsibilities:

- Requirements analysis, Request/response monitoring using proxy server, and maintaining of QA documentation (Test plan, Test strategy, Checklist via TestRail and bug reports etc.), Planning, execution (Smoke, Functional, Non-functional, Regression testing) and reporting of test activities, Git-branch testing (X-Code, Pull Requests), Participating on daily meetings/discussions, Interaction with development team and business analyst, Verification of implemented product according to the requirements, Cross browser testing (Edge, IE, Chrome, FF, Safari), Loading, stress testing (Postman, JMeter).

Technologies: XCode (iOS), Android studio (Android), JavaScript, Git, Charles

Software Test Engineer, Handelsblatt

Nov 2017 - Mar 2018

Description: Digital version of the newspaper. The main idea of the project is to give the

opportunity to read articles online and to download the electronic version of the newspaper and magazine to the phone. The user can add articles to bookmarks, share them in social networks, watch video and audio recordings of reports. The target audience are Germany people who like newspapers.
