

Hiring software engineer as easy as calling a taxi.

Gohar Ali

Senior Full Stack Developer

SUMMARY

Full stack maestro on a mission to craft digital wonders. From pixels to databases, I groove with code and design. Building web dreams with a cup of coffee in one hand and a keyboard in the other. Let's turn ideas into reality!

SKILLS

Main Technical Skills	Web Development, Web Application Development
------------------------------	--

With 8 years of dynamic work experience under my belt, I've honed my skills as a seasoned full stack developer. I'm not just about the code – I'm a digital architect who thrives on turning visions into seamless online experiences. Holding the coveted AWS Solutions Architect certification, I've conquered the cloud and tamed its limitless possibilities.

My academic journey includes a Master's in Information Technology, where I delved deep into the digital realm, and a Bachelor's in Computer Sciences that laid my programming foundation. Balancing innovation and practicality, I'm known for translating complex technical concepts into plain English, bridging the communication gap between tech and non-tech folks.

My career is a mosaic of successful projects, where I've danced with databases, crafted captivating frontends, and secured applications with an eagle eye. I thrive in collaborative environments, valuing every voice in the room. A tech enthusiast at heart, I embrace challenges with a strategic mindset and an arsenal of creative solutions.

From building responsive web interfaces to optimizing server performance, I'm the bridge between elegant design and powerful functionality. Let's connect the dots in the digital world and create a masterpiece together.
