

Hiring software engineer as easy as calling a taxi.

Vadym M

Front-end JavaScript Developer

SUMMARY

- 5+ years of experience as a Front-end JavaScript Developer;
- 5+ years of experience in React.js;
- Proficient in Solana Blockchain operations, including managing deposits, executing transfers, creating Phantom wallets, and handling contract call interactions;
- Strong abilities working with Web3;
- Deep experience in Next.js technology;
- Experience with WebRTC, Socket.io;
- Good knowledge of Tailwind CSS, Bootstrap, and Chakra UI;
- Experience working with Redux, and Docker;
- Familiar with Node.js;
- Proficiency in testing frameworks like Jest and Cypress;
- E-commerce, web, and mobile applications, including learning platforms, chatbots, dApps, and cryptocurrency wallet extensions.

SKILLS

Main Technical Skills	JavaScript (5 yr.), Web3.js, React, WebRTC
Programming Languages	Java, TypeScript
UI Frameworks, Libraries, and Browsers	Ajax, Ant Design (5 yr.), Bootstrap, Bootstrap 4, CSS, HTML, Material UI, SCSS, Socket.io, Storybook, Styled components, Tailwind CSS
JavaScript Frameworks and Libraries	Ethers.js, Express, GatsbyJS, i18next, Mobx, NestJS, Next.js, Node.js, React Hooks, React Query, Redux, Redux Thunk, Redux-toolkit, Styled components
Databases & Management Systems / ORM	MongoDB, PostgreSQL
Industry Domain Experience	Blockchain
Methodologies, Paradigms and Patterns	Agile, Clean Architecture, Kanban, Scrum
QA, Test Automation, Security	Cypress, Jasmine, Jest, Mocha, React-testing-library, Unit Testing

BlockChain and Decentralized Software	dApps, Ethers.js, Hardhat, Solana
Virtualization, Containers and Orchestration	Docker
Project Management & Administration	Problem Solving
Mail / Network Protocols / Data transfer	WebSockets
Other Technical Skills	Chakra UI, CSS3, Ext JS, Openai, React-hook-form, seo, WAGMI, Zustand

WORK EXPERIENCE

Senior Frontend Developer, Shiba Inu

Duration: September 2024 - November 2024

Responsibilities:

- Frontend development and implementation of the UI part using JavaScript, React;
- Engaged in implementing Web3 to enhance decentralized functionalities and user experiences;
- Debugged and resolved issues with legacy features to ensure optimal functionality and system stability.

Technologies: JavaScript, React, Blockchain, TypeScript, Web3.

Senior Frontend Developer, NDA

Duration: January 2023 - Present

Responsibilities:

- improved security best practices and learned how to develop a secure crypto wallet;
- Developed Chrome extensions and modified the functionality of the Chrome web browser;
- Implemented SEO best practices to improve organic search rankings.

Technologies: JavaScript, React, Blockchain, TypeScript, Web3, Next.js.

Senior Frontend Developer, Patex

Duration: January 2023 – March 2024

Summary: Patex Ecosystem: Patex Network (layer 2 blockchain), C-Patex Exchange (centralized cryptocurrency exchange), Patex Wallet (non-custodial crypto wallet), Patex Campus (educational crypto platform).

Responsibilities:

- Improved security best practices and learned how to develop a secure crypto wallet.
- Developed Chrome extensions and modified the functionality of the Chrome web browser.
- Implemented SEO best practices to improve organic search rankings.
- Depositing, transferring, creating a Phantom wallet, and signing contract calls on the Solana Blockchain.

Technologies: JavaScript, React, Blockchain, Redux, REST, Web3, Solana.

Senior React Developer, Pixblocks

Duration: March 2022 – January 2023

Summary: Developed interactive Python learning platform for children with video chat, coding playground, video streaming, and scheduling, including secure logins and in-app purchases.

The platform has an option for the teacher to broadcast his video, sound, and code while live streaming, remotely connect to students, and edit the code during the lesson.

Responsibilities:

- Transfer all functionality to the web version from applications for mobile devices as well as for desktops.
- Connect the backend and firebase to the web application
- Frontend development and implementation of the UI part on the project's website and platform;
- Optimized code for speed and SEO, implemented secure login and in-app purchase features, and mastered Redux state management.

Technologies: JavaScript, React, REST, TypeScript, Next.js, SSR, Redux, WebRTC.

Middle Frontend Developer, Nimbus Platform

Duration: February 2021 – March 2022

Summary: Built a blockchain-based system for secure data storage and transaction processing, alongside developing various web3 decentralized applications.

Responsibilities:

- Developed a blockchain-based system that provided reliable and secure data storage and transaction processing.
- Developed interactive and user-friendly web/mobile applications such as stacking, swapping, transferring, borrowing, and multi-sending web3 dApps.
- Wrote unit tests with Jest, React-testing-library, and Cypress.

Technologies: Blockchain, Jest, React, React-testing-library, Cypress, Next.js, TypeScript, Web3, Ethers.

Frontend Developer, INC4

Duration: January 2018 – January 2021

Summary:

- Created applications for the Ambrosus community, including Staking, Bridge, Explorer, and Assets SRM
- Rebuilt old applications and developed custom UI library

Responsibilities: Developed responsive landing pages, migrated legacy applications to React.js with UX redesign, and engineered a custom UI library.

Technologies: React.js, Redux, HTML, CSS, JavaScript.

Frontend Developer, NDA

Duration: September 2016 - January 2020

Summary:

- Developed and maintained web applications using React, TypeScript, and HTML/CSS;
- Worked with remote teams on a variety of projects, including enterprise CMS and finance applications;
- Experience with unit testing, test-driven development, and continuous integration/continuous delivery (CI/CD);
- Strong problem-solving and debugging skills;
- Ability to work independently and as part of a team.

Technologies: Redux, JavaScript, React, REST, MaterialUi, TypeScript.

EDUCATION

- **Bachelor's degree in Computer Science and Information Technology**
- April 2015 – May 2019
- **Full-Stack developer (Java, Javascript)**
- January 2018 – January 2019
