CISIN Gautam
Senior Senior Node React Developer

SUMMARY

With over 4 years of professional experience in software development, the engineer is proficient in full-stack technologies including Node.js, React, and PHP, complemented by substantial expertise in database management systems like MySQL and MongoDB. Demonstrated history of successful project execution illustrated by roles in the development of complex systems such as a RESTful chat system and an online car auction platform. Strong educational foundation with a Bachelor's in Computer Engineering and importantly, an impressive track record in leading projects, innovation in deployment of applications, and mentoring team members. Technical acumen is enriched by adeptness in LAMP stack, modern JavaScript frameworks, version control using GIT, and the implementation of cloud services and server management.

TECHNICAL SKILLS

Main Technical Skills	Node.js, PHP, JavaScript, jQuery, React
Programming Languages	ColdFusion, JavaScript, PHP
UI Frameworks, Libraries, and Browsers	Ajax, jQuery
JavaScript Frameworks	AngularJS, jQuery, Node.js, React
Cloud Platforms, Services & Computing	Heroku
Amazon Web Services	AWS S3, AWS WorkSpaces
Web/App Servers, Middleware	Apache HTTP Server, gUnicorn, LAMP
Third Party Tools / IDEs / SDK / Services	Apache NetBeans, Sublime Text
SDK / API and Integrations	API, Twilio API
Version Control	BitBucket, Git, SVN
Operating Systems	Centos, macOS, Ubuntu

Other Technical Skills	Unix\Linux

WORK EXPERIENCE

Senior Node React Developer, Chat System

Duration: 12 Months
Summary:

- Developed and maintained a Node
- js-based chat system managing group and personal chats, with an admin area and Facebook group integration for enhanced functionality and data management

Responsibilities: Development and maintenance of Node.js-based chat system, design and implementation of the admin area, integration of Facebook group data into MongoDB.
Technologies: Node.js, jQuery, Git, HTML, MongoDB, MySQL clusters

Senior Node React Developer, Client Bank

Duration: 24 Months
Summary: Utilized React, Git, HTML, Codeigniter (PHP), and MySQL to develop and maintain a lead generation tool for managing client data, appointment scheduling, and automating notifications.
Responsibilities: Developing application for client management, appointment scheduling, communication via emails and SMS, automation of SMS and email notifications.
Technologies: React, Git, HTML, Codeigniter (PHP), MySQL

Senior Node React Developer, Car Marketplace

Duration: 14 Months
Summary: Created an online car auction platform with differentiated user roles and functions, featuring a custom dashboard and a unique bidding feature through WhatsApp groups.
Responsibilities: Development of the car auction platform, user role management, auction status automation and marking cars as sold, dashboard design for transaction history, WhatsApp bidding feature for premium users.
Technologies: Node.js, React, Laravel, MySQL, HTML

EDUCATION

- **Bachelor's in Computer Engineering**
  7.9 CGPA at Rajiv Gandhi Proudyogiki Vishwavidyalaya University
