AZAD M PANTAWANE
Middle Full-Stack Web Developer

SUMMARY

Full-Stack Web Developer with over four years of experience, specializing in the MERN Stack and Python Django. Proven expertise in building scalable, secure web applications and teaching full-stack development principles. Experienced in both frontend and backend development, as well as cross-platform application development. Technical skills include MongoDB, Express, React, Node.js, MySQL, and AWS services. Proficient in SDLC, REST API design, and software development best practices, driving efficiency and performance improvements in web applications. Strong background in delivering in-depth training programs for aspiring software developers, contributing to their career success.

TECHNICAL SKILLS

Main Technical Skills	FDD (4 yr.), React, Python, Node.js
Programming Languages	Python, TypeScript
UI Frameworks, Libraries, and Browsers	Ajax, ckeditor, CSS, Tailwind CSS
JavaScript Frameworks	Express, Node.js, Node.js, React
Python Frameworks	FastAPI
JavaScript Libraries and Tools	React Native, Redux-Saga
Data Analysis and Visualization Technologies	Celonis
Databases & Management Systems / ORM	MongoDB
Amazon Web Services	AWS EC2
Deployment, CI/CD & Administration	CI/CD, GitLab CI, Jenkins
Virtualization, Containers and Orchestration	Docker

SDK / API and Integrations	FastAPI, RESTful API
Methodologies, Paradigms and Patterns	FDD (4 yr.)
Other Technical Skills	MERN stack (MongoDB, Express, React, Node), SweetAlert2

WORK EXPERIENCE

Full-Stack Web Development, Learning Management System (LMS)

Duration: Nov 2022 - Present
Summary: Designed and built a robust Learning Management System (LMS) using Python Django, enabling efficient course management and increasing operational efficiency by 40%.
Responsibilities: Configured LMS hosting with AWS EC2 and MySQL, integrated security features, enhanced batch management and assignment tracking, developed and delivered web development courses, mentored students.
Technologies: Python, Django, AWS, EC2, MySQL, MERN Stack

Full-Stack Web Development, Job Management System

Duration: Dec 2020 - Aug 2022
Summary: Developed and deployed a Job Management System using Django, featuring comprehensive functionalities for job search and management.
Responsibilities: Implemented user registration, job posting, dynamic search, and notifications, ensured secure password resets, refined candidate and employer management, optimized database integrity and project performance.
Technologies: Python, Django, AJAX, SweetAlert2, CKEditor, GoDaddy

EDUCATION

- **BBA in Marketing Management**
  04/2013 - 04/2017
