

Andrii V.

Senior Senior Ruby on Rails Engineer

SUMMARY

- 15+ years of professional experience in software engineering, including 10+ years specializing in Ruby on Rails.
- Skilled in Ruby, Ruby on Rails, JavaScript/TypeScript, React JS, Angular JS, and RESTful API design, cloud platforms (AWS, Azure, GCP) and containerization (Docker, Vagrant).
- Experience in software architecture, design patterns, UML, MVC, TDD, BDD, and Agile methodologies (Scrum, Kanban, XP), SDLC.
- Leadership in large-scale projects including telemedicine, legal services, and e-commerce platforms, driving architecture, team coaching, and performance optimization (Elasticsearch, Sidekiq), and advanced database technologies (MySQL, PostgreSQL, MongoDB).
- Skilled in memory optimization, big data processing, API integration, code refactoring, and comprehensive documentation, delivering scalable and maintainable solutions across diverse domains.

TECHNICAL SKILLS

Main Technical Skills	Ruby, Ruby on Rails
Programming Languages	JavaScript, Ruby, TypeScript
JavaScript Frameworks	Angular, AngularJS, React
.NET Platform	Azure
JavaScript Libraries and Tools	p5.js
Ruby Frameworks	Ruby on Rails
Ruby Libraries and Tools	Sidekiq
Data Analysis and Visualization Technologies	Kibana
Databases & Management Systems / ORM	AWS ElasticSearch, Elasticsearch, MongoDB, MySQL, PostgreSQL, SQL

UI Frameworks, Libraries, and Browsers	Bootstrap 4
Cloud Platforms, Services & Computing	AWS, Azure, DigitalOcean, GCP, Heroku
Amazon Web Services	AWS ElasticSearch
Methodologies, Paradigms and Patterns	Agile, Architecture and Design Patterns, BDD, FDD, Kanban, MVC, Observer, OOP, REST, Scrum, SDLC, TDD, UML, Waterfall
Logging and Monitoring	Airbrake, Datadog, Logstash
Web/App Servers, Middleware	Apache HTTP Server, Nginx, Puma (Ruby/Rack Web Server)
SDK / API and Integrations	API, GraphQL, RESTful API
Collaboration, Task & Issue Tracking	Atlassian Confluence
Third Party Tools / IDEs / SDK / Services	Atom, IntelliJ IDEA, Microsoft Visual Studio Code, Sublime Text
QA, Test Automation, Security	BDD, Postman, RSpec, Unit Testing
Platforms	CRM
Virtualization, Containers and Orchestration	Docker, Vagrant
Operating Systems	macOS, Ubuntu, Windows
Other Technical Skills	Ruby/Rack Web Server

WORK EXPERIENCE

Senior Ruby on Rails Engineer / Team Lead, Platform to provide telemedicine

Duration: 2 years 3 months

Summary: One of the biggest telemedicine providers. Healthcare project that allows users to get doctor appointments, consultations, and medicine receipts. It was built as a multiplatform solution to cover requirements of clients in the US, Canada, and Europe, using feature toggles for easy customization.

Responsibilities:

- Architecture and design;
- Knowledge sharing and coaching;
- Maintaining optimal workflow and team load;
- Requirements analysis and clarification;
- Estimation, prioritization, and distribution of tasks, iteration planning;
- Code development and unit testing;
- Product support and documentation maintenance.

Technologies: Ruby on Rails, React JS, REST, GraphQL, MySQL, Confluence, Scrum, Elasticsearch, Logstash, Kibana.

Senior Ruby on Rails Engineer, Platform provides law services

Duration: 6 months

Summary: Online platform for legal services in tenancy law, labor law, and telecommunications law. The platform facilitates enforcing legal claims conveniently and without financial risk for users

Responsibilities:

- Architecture and design;
- Knowledge sharing and coaching;
- Requirements analysis and clarification;
- Estimation, prioritization, and distribution of tasks;
- Code development and unit testing;
- Product support and documentation maintenance;

Technologies: Ruby on Rails, MongoDB, Confluence, Scrum.

Senior Ruby on Rails Engineer, DooMoo

Duration: 2 months

Summary: Customized CRM implemented using Ruby on Rails without any CRM gem. It allows customers to easily create content for baby products with structures supporting proper product selection

Responsibilities:

- Architecture and design;
- Requirements analysis and clarification;
- Estimation, prioritization, and distribution of tasks;
- Code development and unit testing;
- Product support and documentation maintenance.

Technologies: Ruby on Rails, JavaScript, RSpec.

Senior Ruby on Rails Engineer, On Running

Duration: 1 month

Summary: On Running is a company based in the Swiss Alps focused on revolutionizing running sensations with innovative shoes. The company sells products in over 50 countries and has multiple international offices.

Responsibilities:

- Architecture and design;
- Requirements analysis and clarification;
- Estimation, prioritization, and distribution of tasks;
- Code development and unit testing.

Technologies: Ruby on Rails.

Senior Ruby on Rails Engineer, Platform for rental deals

Duration: 7 months

Summary: A tool that facilitates rental deals by allowing users to sign documents remotely and make payments through various methods.

Responsibilities:

- Architecture and design;
- Requirements analysis and clarification;
- Estimation, prioritization, and distribution of tasks;
- Code development and unit testing;
- Product support and documentation maintenance.

Technologies: Ruby on Rails.

Middle Ruby on Rails Engineer, Crypto strategy analyzer platform

Duration: 7 months

Summary: Platform that allows users to make investments and earn profits using cryptocurrency by applying different investment strategies.

Responsibilities:

- Architecture and design;
- Requirements analysis and clarification;
- Estimation, prioritization, and distribution of tasks;
- Code development and unit testing;
- Product support and documentation maintenance.

Technologies: Ruby on Rails, Angular JS.

Middle Ruby on Rails Engineer, Charity online platform

Duration: 5 months

Summary: Platform supporting churches, schools, and nonprofit organizations by enabling fundraising campaigns, ticket sales for charity events, volunteer alignment, and donor communication with built-in engagement tools.

Responsibilities:

- Architecture and design;
- Requirements analysis and clarification;
- Estimation, prioritization, and distribution of tasks;
- Code development and unit testing;
- API documentation support.

Technologies: Ruby on Rails, React JS.

Middle Ruby on Rails Engineer, Online product building platform

Duration: 4 months

Summary: Tool that helps users build their own mobile business apps using ready-made business industry templates covering most business app needs, including secure cloud hosting, licenses, and system upgrades without requiring specialist hardware or software.

Responsibilities:

- Code development and unit testing;
- Product support and documentation maintenance.

Technologies: Ruby on Rails.

Middle Ruby on Rails Engineer, Rental search and analyzer project

Duration: 1 year 4 months

Summary: The world's largest online search engine for rentals, allowing users to compare properties from top rental sites worldwide, covering over 10 million rentals in 150,000 destinations.

Responsibilities:

- Knowledge sharing and coaching;
- Requirements analysis and clarification;
- Estimation of tasks;
- Code development and unit testing.

Technologies: Ruby on Rails, React JS, Sidekiq (Pro, Enterprise), AWS services, Elasticsearch, DataDog.

Junior Ruby on Rails Engineer, VoIP service and smart security systems provider

Duration: 1 year 4 months

Summary: Product offering consumer and business products providing free and low-cost US and Canadian telephone calling and advanced cloud-based telephony services globally.

Responsibilities:

- Code development and unit testing;
- Product support and documentation maintenance.

Technologies: Ruby on Rails, React JS, HTML, CSS, Airbrake.

EDUCATION

- **Master's Degree in Computer Science and System Analytics**
The Bohdan Khmelnytsky National University
Graduated in 2008.
