

Evgeniy A.

Senior Senior Full-Stack Developer | Solution Architect

SUMMARY

- Expertise in microservices, event-driven, and service-oriented architectures with strong focus on scalable, maintainable system design.
- Proficient in PHP, Node.js, Python, Golang; developed AI-powered financial portals and algorithmic trading systems.
- Skilled in full-stack development using React, Vue.js, Next.js, and Nuxt.js with REST and WebSocket APIs.
- Experienced in DevOps: Docker, CI/CD pipelines, Linux server administration, and automated deployments.
- Delivered complex projects including VIP online gaming platforms, AI automation systems, and financial APIs integration.

TECHNICAL SKILLS

Main Technical Skills	PHP, Node.js, Python, Go, React
Programming Languages	Go, JavaScript, PHP, Python, TypeScript
JavaScript Frameworks	Express, NestJS, Next.js, Node.js, Nuxt, React, Vue.js
Databases & Management Systems / ORM	MariaDB, MongoDB, MySQL, PostgreSQL, Redis
UI Frameworks, Libraries, and Browsers	CSS3, HTML5
UI/UX/Wireframing	Adobe Photoshop, Figma
Web/App Servers, Middleware	Apache HTTP Server, Nginx
Deployment, CI/CD & Administration	CI/CD, GitLab CI
Virtualization, Containers and Orchestration	Docker, Docker Compose, Kubernetes
Version Control	Github Actions
Logging and Monitoring	Grafana, Sentry
Operating Systems	Linux
SDK / API and Integrations	Telegram API
Platforms	WordPress

WORK EXPERIENCE

Solution Developer / Full-Stack Engineer - Freelance / Self-Employed (Algorithmic Trading Systems and Trading Algorithms)

Duration: 2003 – Present

Summary: Design and development of algorithmic trading systems and trading algorithms to automate financial trading processes and improve trading efficiency.

Responsibilities:

- Design and develop algorithmic trading systems and trading algorithms.
- Analyze business requirements and design technical solutions.
- Integrate financial APIs and third-party services.
- Optimize system performance and scalability.
- Communicate with clients and stakeholders to deliver tailored solutions.

Technologies: PHP, Python, Golang, Node.js, financial APIs, PostgreSQL, MySQL, MongoDB, Redis, Docker, Docker Compose, CI/CD

Solution Developer / Full-Stack Engineer - Freelance / Self-Employed (E-commerce Websites, Online Auctions, and Custom CMS Solutions)

Duration: 2003 – Present

Summary: Development of e-commerce websites, online auction platforms, and custom content management systems to support online business operations and sales.

Responsibilities:

- Develop e-commerce websites and online auction platforms using PHP and custom CMS solutions.
- Integrate REST APIs and third-party services for payment gateways and other functionalities.
- Design and implement backend and frontend components.
- Ensure responsive and adaptive layouts for web applications.

Technologies: PHP, WordPress, custom CMS, JavaScript, Vue.js, Nuxt.js, React, Next.js, HTML5, CSS3, PostgreSQL, MySQL, Docker

Solution Developer / Full-Stack Engineer - Freelance / Self-Employed (Telegram Bots Development)

Duration: 2003 – Present

Summary: Development of Telegram bots for automation, communication, and integration with various services to enhance business processes.

Responsibilities:

- Develop Telegram bots using Python and PHP.
- Integrate bots with social media APIs such as Instagram, Facebook, YouTube, and LinkedIn.
- Automate business processes and data collection.

Technologies: Python, PHP, Telegram Bot API, Instagram API, Facebook API, YouTube API, LinkedIn API

Solution Developer / Full-Stack Engineer - Freelance / Self-Employed (AI and Automation Integration into Web Applications and Business Processes)

Duration: 2003 – Present

Summary: Integration of AI and automation technologies into web platforms and business workflows to enhance efficiency and provide intelligent solutions.

Responsibilities:

- Integrate AI-powered systems and automation tools into existing web applications.
- Develop AI-powered financial portals and AI operating systems.
- Design and develop microservices and backend services supporting AI functionalities.

Technologies: Python, Node.js, Golang, AI integrations, microservices, REST APIs, Docker, PostgreSQL, MongoDB

Solution Developer / Full-Stack Engineer - Freelance / Self-Employed (Front-End Applications Development)

Duration: 2003 – Present

Summary: Development of front-end applications using modern JavaScript frameworks to create responsive and user-friendly web interfaces.

Responsibilities:

- Develop front-end applications using Vue.js, Nuxt.js, React, and Next.js.
- Implement responsive and adaptive layouts using HTML5 and CSS3.
- Apply basic UI/UX design principles using Figma and Photoshop.

Technologies: Vue.js, Nuxt.js, React, Next.js, JavaScript, TypeScript, HTML5, CSS3, Figma, Photoshop

Solution Developer / Full-Stack Engineer - Freelance / Self-Employed (Backend Services Development)

Duration: 2003 – Present

Summary: Development of backend services and APIs to support web platforms, microservices, and high-performance applications.

Responsibilities:

- Develop backend services using PHP, Node.js, Python, and Golang.
- Design and implement REST APIs and WebSocket-based systems.
- Integrate payment gateways and third-party services.
- Optimize database schemas and queries.

Technologies: PHP, Node.js, Python, Golang, Express.js, NestJS, REST APIs, WebSocket, PostgreSQL, MySQL, MongoDB, Redis

Solution Developer / Full-Stack Engineer - Freelance / Self-Employed (DevOps and Infrastructure Management)

Duration: 2003 – Present

Summary: Management of deployment, containerization, and server administration to ensure reliable and efficient operation of web applications.

Responsibilities:

- Configure and manage Docker and Docker Compose environments.
- Set up CI/CD pipelines using GitHub Actions and GitLab CI.
- Automate deployment to VPS environments.
- Administer Linux servers and configure web servers such as Nginx and Apache.
- Monitor system performance and error tracking using Grafana and Sentry.

Technologies: Docker, Docker Compose, CI/CD, GitHub Actions, GitLab CI, VPS, Linux, Nginx, Apache, Grafana, Sentry

EDUCATION

- **Bachelor's Degree — Enterprise Management: Organizational and Legal Support**
2005
