UPSTAFF

Vladyslav Antonov
Junior PHP FULL-STACK DEV

SUMMARY

With over a year of experience, I have developed strong expertise in CS-Cart, MySQL, jQuery, PHP, JavaScript, and CRON systems. My background also includes extensive work with APIs and handling XML, CSV, and XLS file formats, knowledge of Laravel.

TECHNICAL SKILLS

Main Technical Skills	PHP, JavaScript (1 yr.), MySQL (1 yr.), Cs-cart (1 yr.)
Programming Languages	JavaScript (1 yr.), PHP
Databases & Management Systems / ORM	MySQL (1 yr.)
Platforms	Cs-cart (1 yr.)

Full-Stack Developer, UPMYCART

January 2024 - Present

- Developed and optimized custom modules for CS-Cart, enhancing functionality and user experience.
- Managed integration with APIs, processing large datasets (up to 20,000 products) for e-commerce platforms.
- Configured and maintained CRON jobs for automating key processes, including product import/export tasks.
- Created efficient SQL queries and utilized Smarty templates to improve database management and performance.
- Built scalable web applications using the Laravel framework, implementing dynamic, responsive interfaces.
- Implemented jQuery and AJAX to create interactive, user-friendly front-end elements.
- Enhanced user experience on multilingual sites, supporting more than 10 websites across Europe.
- Integrated the CTT API to display map-based pickup locations, improving customer convenience.
- Developed product and stock synchronization functionalities via warehouse APIs for accurate inventory management.
- Provided technical assistance and support to clients, aiding in successful project task implementations.
