JavaScript Libraries and Tools	LoopBack, Swiper
PHP Libraries and Tools	PhpStorm, PHPUnit (1 yr.)
Python Libraries and Tools	Scikit-learn
JavaScript Frameworks	Vue.js
Databases & Management Systems / ORM	PostgreSQL, SQL (3 yr.), SQLite
UI Frameworks, Libraries, and Browsers	Ajax (1 yr.), Bootstrap 4 (3 yr.), LESS (1 yr.), SASS (1 yr.), Tailwind CSS
Web/App Servers, Middleware	Apache HTTP Server
SDK / API and Integrations	API (1 yr.), FastAPI (1 yr.), PayPal API (1 yr.), Stripe (1 yr.)
Version Control	BitBucket, Git, Github Actions
Virtualization, Containers and Orchestration	Docker (1 yr.), Docker Compose

UI/UX/Wireframing	Elementor
Methodologies, Paradigms and Patterns	FDD (1 yr.)
Deployment, CI/CD & Administration	GitLab CI, Jenkins (1 yr.)
Mail / Network Protocols / Data transfer	IEEE 1394 (1 yr.)
Third Party Tools / IDEs / SDK / Services	PhpStorm, Visual Studio
QA, Test Automation, Security	PHPUnit (1 yr.)
Platforms	Red Hat OpenShift Container Platform, WordPress
Operating Systems	Ubuntu (1 yr.), Windows
Other Technical Skills	Carbon Fields, Gravity Forms, Meta, Phpstan, Polylang

WORK EXPERIENCE

Full Stack WordPress Developer (SEO-Optimized Microsite System on WordPress (Template-Based))

Duration: 0.5 years
Summary:

- Scalable WordPress-based template system for an international AdTech company specializing in lead generation
- The solution enables the client to deliver fast, SEO-optimized microsites with custom branding and responsive design by reusing pre-built templates categorized by niche and style
- This approach significantly reduced delivery time and improved consistency across projects

Responsibilities:

- Developed and customized WordPress themes and plugins
- Designed dynamic template structures for flexible content handling
- Implemented SEO-friendly architecture and optimized performance
- Integrated interactive components with JavaScript and Swiper
- Ensured responsive and accessible frontend design
- Collaborated with the client to refine templates for multiple industries
- Tested, debugged, and optimized reusable modules for scalability

Technologies: PHP, WordPress, JavaScript, Swiper, HTML, CSS, MySQL, Git

Full Stack Developer (ECommerce Platform with Advanced Admin Tools & Loyalty System)

Duration: 1 years
Summary:

- A multilingual eCommerce platform for a German confectionery brand specializing in candies and branded accessories
- The platform was developed to migrate the old store to a modern CMS with improved UX, dynamic cart updates, flexible promotions, multilingual support, and extended admin capabilities
- It enables seamless order handling, product filtering, loyalty programs, and integrations with multiple payment systems

Responsibilities:

- Back-end development
- Front-end development
- Integration with Stripe, PayPal, GPay, and bank transfers
- Development of multilingual support and localized URL structures
- Implementation of real-time cart updates and product filtering
- Building a user-friendly admin panel with role-based access
- Testing, debugging, and performance optimization

Technologies: PHP, WordPress, WooCommerce, JavaScript, AJAX, Stripe, PayPal, GPay, Swiper, HTML, CSS

PHP Back-End Developer (Website for virtual reality equipment)

Duration: 1.5 years
Summary:

- An e-commerce website specializing in the sale and rental of virtual reality equipment
- The platform automates sales accounting and increases sales efficiency and profitability
- A CRM system was created for administration and control of company processes
- Telegram integration was implemented to improve customer communication, allowing customers to create bookings and calculate net profit from bookings

Responsibilities:

- Back-End Development
- Automating sales accounting
- Database creation and management
- CRM development
- Integration with Telegram
- Creation of chatbot
- Fixing accounting formulas
- Testing and debugging

Technologies: PHP, Laravel, Livewire, MySQL, Bootstrap, HTML, CSS, PHPUnit, RestAPI

PHP Developer (Online auction platform)

Duration: 1.5 years
Summary:

- An online platform where state and municipal customers announce tenders for the purchase of goods, works, and services, and business representatives compete in bidding to supply these to the state
- The platform supports transparent sales and tender processes

Responsibilities:

- Back-end development
- Adding new features and extending them
- Automation processes
- Work with testing on Jenkins
- Unit tests
- Bug fixing

Technologies: YII2, LESS, Sass, MySQL, Jenkins, Bootstrap, Docker, Ubuntu
