

Lalit

Senior Senior Full Stack Developer

SUMMARY

A seasoned Full Stack Developer brings over six years of experience, specialized in JavaScript, Golang, and React Native, with profound knowledge of modern frameworks like NextJS and NestJS. Proven track record in leading projects from inception to launch, showcased through success in diverse domains such as Legal Tech, AgriTech, and Health. Demonstrates expertise in writing efficient, optimized code, backed by the ability to guide design efforts and manage installations for on-time product rollouts. Familiar with CI-CD pipelines, evident from setting up CircleCI, and skilled in complex technology ecosystems, including Microservices, Kubernetes, Docker, and AWS. Adept at full lifecycle software development practices, integrating various technologies with a focus on robust, scalable web and server solutions.

TECHNICAL SKILLS

Main Technical Skills	JavaScript (6 yr.), React (6 yr.), Go, Node.js, React Native
Programming Languages	Go, JavaScript (6 yr.)
UI Frameworks, Libraries, and Browsers	Bootstrap 4, CSS (6 yr.), HTML (6 yr.), Material UI, Socket.io, Tailwind CSS
Mobile Frameworks and Libraries	Crashlytics
JavaScript Frameworks	Express, Node.js, React (6 yr.)
JavaScript Libraries and Tools	mui, React Native
Databases & Management Systems / ORM	MongoDB, PostgreSQL
Cloud Platforms, Services & Computing	Vercel
Deployment, CI/CD & Administration	CircleCI
QA, Test Automation, Security	Cypress

BlockChain and Decentralized Software	Dapp, MetaMask, NFT
Version Control	Git (6 yr.), Github Actions (6 yr.)
SDK / API and Integrations	GraphQL, RESTful API (6 yr.)
Mail / Network Protocols / Data transfer	GRPC
Methodologies, Paradigms and Patterns	microservices

WORK EXPERIENCE

Lead Full Stack Developer, Neptune Project

Duration: 1.5 years

Summary: Neptune is an AI-powered concierge service that helps couples through the prenuptial agreement process by engaging in personalized conversations and connecting them with family law attorneys.

Responsibilities: Leading the development process, implementing optimized code, maintaining high code quality, and mentoring team members.

Technologies: React, Golang, Rest APIs, Firebase, Tailwind

Lead Full Stack Developer, Circonomy Project

Duration: 1 year 2 months

Summary: Circonomy aims at reducing agriculture waste and carbon in the atmosphere by creating platforms for farmers to track biochar application to crops and biomass collection.

Responsibilities: Leading the development process, implementing optimized code, managing major project integrations, and providing detailed feedback on PRs.

Technologies: React, Golang, Rest APIs, React Native, Firebase, Tailwind

Full Stack Developer, IKEA Digital Project

Duration: 1 year

Summary: IKEA Digital involves designing and developing software solutions for the multinational conglomerate to enhance their cybersecurity measures.

Responsibilities: Full cycle development, optimizing code, identifying areas for improvement, creating changes, and conducting end-to-end testing for production readiness.

Technologies: Node, React, HTML, CSS, MUI, REST APIs

Full Stack Developer, Project Hero

Duration: 1.5 years

Summary: Project Hero is the largest skilled workers marketplace providing insights into worker productivity, facilitating payment updates, and tracking daily tasks.

Responsibilities: Full stack development, code review, Proof of Concept implementation, and training new team members on best coding practices.

Technologies: Golang, ReactJS, React Native, Rest APIs, HTML, CSS, Material

React Developer, HeyRenee Project

Duration: 8 months

Summary: HeyRenee is a health tech startup offering a platform that simplifies managing patient prescriptions, appointments, test reports, and medicine reminders post-medical treatment.

Responsibilities: Developing the user interface, writing optimized React code, and integrating third-party libraries for UI components.

Technologies: React, Typescript, HTML, CSS, Material
