EXPERIENCE

Full stack developer, Casavillar

April 2020 – Present

Responsibilities:

- Implemented complex UI components with React/Typescript and SCSS
- Heavily used React/Redux to produce customer tools with a clean and smooth UI
- Built backend Rest API end points using NodeJS
- Used Vuetify to implemented the reusable components for admin panel for a market campaign company
- Worked on tight deadlines

Frontend developer, Casavillar

May 2018 – March 2020

Responsibilities:

- Implemented complex UI components with React/Redux and Vue/Vuex
- Collaborated with designers in my development process.
- Implemented pixel perfect design from PSD and Adobe XD designs
- Converted a traditional web application to single-page application using AJAX and a state management layer in JavaScript.
- Built a booking page which consists of four steps using MERN stack
- Optimized speed of the site

Intern, Index Digital

November 2017 – April 2018

Responsibilities:

- Worked on common HTML/CSS/Javascript stuff

- Built a authentication system for various users using NodeJS
- Using Bootstrap to build mobile optimized UI/UX
- Built single page application with React/Redux

EDUCATION

Bachelor's degree in Computer Science, Digital College

April 2015 - April 2018
