EXPERIENCE

Salesforce consultant

September 2021 to Current

Salesforce Developer

October 2014 to September 2021

Technical Highlights:

- Developing various Lightning components with Aura Frame Work
- Developing various Lightning components with LWC (Lightning Web Components)

- Expertise in developing Sales applications on Force.com platform
- Developing and customizing applications within Salesforce using Apex, Visualforce and Triggers
- Developed pages on Community based on Lightning. Ability to develop applications and components in Lightning
- Proficient in developing integrations between Salesforce.com using REST API.
- Responsible for designing pages for Mobile using Salesforce1 application. Can work on different web-based technologies like HTML, CSS and Java Script.
- Good idea on performing Deployments using Change sets, Eclipse IDE and ANT Migration Tool.
- Data Migration using Data Loader, Import Wizard and Talend (ETL Tool).
- Experience in working with Creating field sets and Force.com Sites.
- Good experience in automating Force.com application using Workflow, Approvals, Validation Rules
- Reporting and Summarization of data using Reports and Dashboards.
- Building Dataset, Dataflow, Lenses and Wave Dashboards.

Wave Analytics Implementation:

We create dashboards, lenses, data sets by using WAVE. Represent sales of Optical for different regions in different season measure by using WAVE Dashboard

Sales Cloud Implementation for a Retail Organization:

The Retail Application designed to meet the needs of retailer. Retail CRM solution help Retailers of all sizes increase revenue and gain a competitive advantage on our new generation integrated CRM platform. It helps to track the customers, Distributors, Revenue by Outlets and Orders with respect to retailer.

Developed Visualforce pages to capture Orders and created reports to give a complete overview of sales by outlets and Sales Persons

Data Migration for an Organization from a Legacy System

I have created data migration jobs to transfer data into Salesforce from a legacy system. An Open Source ETL tool is being used to transfer the data between 2 environments. The project involves a testing Stage followed by UAT and final round of migration to Production environment.

Project Management Tool

This is an Enterprise application developed an application on Force.com Platform to meet the needs of Project Management among different departments in the organization.

Created Visualforce pages and Triggers to automate the Project Process.

Created charts based on Google APIs which shows the summarized information of tasks.

Created Gantt Charts which helps in Analyzing the Task Start and End Dates, Status and Type of Tasks for the specific project

Recruiting Application for a HR Consultancy

The Recruiting application keeps track of all the candidates, Jobs and Companies. I have developed a search engine for the Candidates to search jobs and for the partners to search Candidates based on filters. The filters include Candidate Experience, qualifications, Roles and responsibilities.
