- Mentoring, Code Review.

Technologies: IntelliJ IDEA, Jenkins, Java, TestNG, Selenium, Rest Assured, JsonNode, SVN

AQA Engineer

Sep 2021 - Jan 2022
Description: Light control System ZUM-FLOOR-HUB
Responsibilities:

- Stabilizing of auto tests/Updating of auto tests;
- Analyzing legacy framework;
- Updating framework;
- Creating new parts of the framework;
- Working on API auto test;
- Working on WebUI auto test, cross-browser and features testing;
- Working with hybrid mobile App on Android OS;
- Working with SVN;
- Investigating project documentation. Code Review.

Technologies: IntelliJ IDEA, Java, TestNG, Selenium, Android Driver, Rest-assured, JsonNode, SVN, Appium Server, Appium inspector, Vysor

AQA Engineer

Sep 2020 - Sep 2021
Description: System to manage/control pipeline of oil and gas
Responsibilities:

- Stabilizing of auto tests;
- Updating of auto tests;
- Using BDD test tool and frameworks;
- Working with git and Jenkins;
- Investigating project documentation;
- Testing of Web UI cross-browser and features testing.

Technologies: IntelliJ IDEA, Jenkins, JavaScript

AQA Engineer

Mar 2020 - Sep 2020
Description: Migration of application
Responsibilities:

- Creating/updating test framework;
- Creating new parts of the framework;
- Working on API auto test. Working with GitHub;
- Investigating project documentation. Code Review.

Technologies: IntelliJ IDEA, Jenkins, Java, TestNG, Selenium, Rest Assured, JsonNode, GitHub

AQA Engineer

Oct 2018 - Mar 2020
Description: Online store
Responsibilities:

- Stabilizing of auto tests;
- Updating of auto tests;
- Using BDD test tool and frameworks;
- Working on API auto test;
- Working with git and Jenkins;
- Investigating project documentation;
- Testing of WevUI, cross-browser and features testing.

Technologies: IntelliJ IDEA, Jenkins, Java, TestNG, Selenium, Rest-assured, BDD test tool and frameworks (FitNesse, Cucumber)

AQA Engineer

Jan 2018 - Oct 2018
Description: Business management tool
Responsibilities:

- Stabilizing of auto tests;
- Updating of auto tests;
- Creating WebUI auto tests;
- Working on API auto test;
- Working with git (git extension) and Jenkins;
- Investigating project documentation;
- Testing of WevUI, cross-browser and features testing.
