

Eduard N.

Middle JavaScript Developer

SUMMARY

Software engineer specializing in full-stack JavaScript development, encompassing expertise in technologies such as React.js, Node.js, and TypeScript. Notable for driving the transition of a social media management platform from AngularJS to React and implementing robust features including API sync with Instagram. Engineered a time tracking application, demonstrating proficiency with database management and API extension. Delivered an assistive app for children, establishing strong foundations in UI/BE and documenting Node.js processes. With a solid background from O.M. Beketov National University, this developer combines technical skills with practical experience. Fluent in modern JavaScript standards (ES 11/12) and adept in tools like Redux and Docker, the candidate offers a comprehensive skill set for innovative software solutions.

TECHNICAL SKILLS

Main Technical Skills	JavaScript, TypeScript, React (4 yr.), Node.js (4 yr.)
Programming Languages	JavaScript, TypeScript
JavaScript Frameworks	Angular, AngularJS, Express, Lodash, Moment.js, Node.js (4 yr.), React (4 yr.)
JavaScript Libraries and Tools	i18next, Mongoose, Redux-toolkit, Styled components
Databases & Management Systems / ORM	Typeorm
UI Frameworks, Libraries, and Browsers	CSS, HTML5, SASS, Styled components
UI/UX/Wireframing	Adobe After Effects, Figma
Deployment, CI/CD & Administration	Axios
Other Technical Skills	Google Calendar

WORK EXPERIENCE

JavaScript full-stack developer, Iterius

Duration: 01/2024 - 12/2024

Summary: Iterius is an application for tracking working hours and generating reports for each employee/user.

Responsibilities: Develop application UI and BE, database servicing, expanding API for new features, adding new tables into DB, updating current tables with migrations.

Technologies: Typescript, React, MobX, Node.js, TypeORM, PostgreSQL, Lodash, Moment, i18next, axios, express, Git, Docker, Figma

JavaScript full-stack developer, SkedSocial

Duration: 02/2022 - 01/2024

Summary: SkedSocial is a social media management platform that allows managing multiple social accounts.

Responsibilities: Develop application customer-facing UI and back-end services, database servicing. Executed update from custom calendar based on AngularJS to Mobiscroll calendar library. Added possibility to mention other accounts when posting into LinkedIn and Instagram. Synced Instagram chat with application. Made migration from AngularJS to React for application. Updated MongoDB version.

Technologies: Typescript, React, Redux Toolkit, Effector, Node.js, Mongoose, MongoDB, Mobiscroll calendar, Lodash, Styled components, Moment, axios, express, Git, Figma

JavaScript full-stack developer, GOALLY

Duration: 04/2021 - 03/2022

Summary: Goally is an assistive application for kids with ADHD or autism, including web and mobile apps, an admin panel, and a behavior tracker.

Responsibilities: Develop application UI and BE, design development from scratch, documenting Node.js processes, including database schemas, as well as preparing reports.

Technologies: Typescript, Node.js, MongoDB, React
