

Vikas

Middle Sr. Software Developer

SUMMARY

A senior software developer with over 3 years of expertise in MEAN stack development, skilled in JavaScript, TypeScript, and advanced web technologies including Angular 2x-13x, Ionic 5x-6x. Demonstrated experience in full-stack development, proficient in both frontend and backend technologies with a keen understanding of Expressjs, Node.js, Angular, and React. Strong background in cloud services like AWS and GCP, and in employing version control with GIT/ GITHUB. Established track record in working with databases such as MySQL and MongoDB, and integrating payment gateways like RazorPay, PayPal, and Stripe. Computer Science graduate from Jabalpur Engineering College with a firm foundation in DBMS, programming languages, and machine learning. Proven ability in leading the development lifecycle of software applications, optimizing for performance and scalability, and contributing to high-quality, reusable code.

TECHNICAL SKILLS

Main Technical Skills	JavaScript, TypeScript, Express, Node.js, Angular
Programming Languages	JavaScript, TypeScript
JavaScript Frameworks	Angular, Express, Node.js

WORK EXPERIENCE

Sr. Software Developer, Employee-Opinion

Duration: AUG 2019 - PRESENT

Summary: A Cloud-based Employee-Company Review Base System facilitating reviews and enabling companies and employees to find their best fits.

Responsibilities: Building a complete frontend application, optimizing for speed and scalability, writing tested and documented code, setting up the project on a server.

Technologies: Nodejs, Express, HTML, CSS, JQuery

Sr. Software Developer, Paciolo

Duration: AUG 2019 - PRESENT

Summary: Cloud management software for independent business management, handling document flow, invoicing, accounting, work management and advanced communication.

Responsibilities: Participated in all stages of application development, from

business requirements mapping to technology implementation.

Technologies: Angular, Node, Express, MySQL

Sr. Software Developer, EV-Urjaa

Duration: AUG 2019 - PRESENT

Summary:

- Complete infrastructure with IOT for electric vehicle battery swapping
- Includes web and mobile applications providing real-time data on battery locations and health

Responsibilities: Contributed to the development of the system, ensuring optimal functionality and realtime data reporting.

Technologies: Ionic 5, Angular 8, MongoDB, Node JS, Express JS

Sr. Software Developer, Keen Building

Duration: AUG 2019 - PRESENT

Summary: Web application for the real estate sector aimed at simplifying property search and facilitating interaction between job seekers, companies, and property listings.

Responsibilities: Worked on the user interface, database management, and server setup, ensuring a dynamic and up-to-date experience for users.

Technologies: Angular 8, MySQL (Squelize), Node JS, Express JS

Sr. Software Developer, Livestream

Duration: AUG 2019 - PRESENT

Summary: E-commerce platform utilizing social media for product sales, live streaming, invoicing and payment integration.

Responsibilities: Involved in integration of social media for product promotions and streamlining the payment process via platforms like Paypal.

Technologies: Angular, Mysql Sequelize, Node Js, Social Logins

EDUCATION

- **BE in Computer Science**

Studied at Jabalpur Engineering college, covering subjects such as DBMS, C and C++, Java, Data Structure, Machine Learning.
2019

CERTIFICATION

- **Database management industrial workshop**
- **MEAN stack training**
- **Java Servlet**
